#### Tea jar

After I started drinking tea, I started to notice that tea cans are used almost every day, but they are rarely mentioned. Many tea products on the market are canned or boxed, and most people are generally not special. Care about the quality of the tea pot, just think of the tea pot as one of the beautiful decoration of the tea gift box, or maybe because most people pay attention to the tea after the home, only the tea itself will ignore other places; In addition to the storage of tea, there can be many other uses, not necessarily only for storing tea, such as snacks, money jars, and furnishings. So I hope everyone can get to know the tea pot before making the decision to make a tea pot. Tea props made of clay and hand-made are one of the spiritual objects of oriental food culture since ancient times; the design concept is based on the four seasons, and the four seasons of flowers and plants are used as tea pot drawing objects. , Turn colorful colors and geometric shapes into visual images of tea cans.
